

Victory row perks

Shuffle the tokens and **deal four to each player**. Put one on each of **slots 1 to 4** of your victory row, face up — your choice which goes where, and it is **permanent** once a card reaches the row. The fifth slot stays blank: it fills on your first research, so a perk there would be a baseline everyone has rather than a bet anyone made.

A perk is live while its slot holds a card. Cards fill the row from the right, so **slot 4 wakes at two cards, slot 3 at three, slot 2 at four and slot 1 needs all five** — the slot is the bet. Spend a perk by turning its token over; turn every token back when your hand recycles.

Every perk is equal — there are no better or worse kinds, only the two ways they work: **SPEND** perks turn face down when used and come back on your recycle; **STANDING** perks simply run while their slot holds a card and never turn over.

Cutting: the dashed rectangles are cuts. The dotted line down the middle of each token, marked with a triangle at each end, is a **fold** — fold it backwards so both printed faces end up outside, and glue.
