

Perk tokens

The full rules are in the **perks module** document. In short: shuffle the 19 tokens and **deal four to each player**. Lay one above each of **slots 1 to 4** of your victory row, face up — your choice which goes where, and it is **permanent** once a card reaches the row. Slot 5 stays empty.

At each recycle, after income and before you pick up your discard, turn every token face up and **arm one perk** whose slot your row reaches: **slot 4 at two cards, slot 3 at three, slot 2 at four and slot 1 at all five**. Turn the armed token sideways. It runs until your next recycle, even if you spend the card that unlocked it. **SPEND** perks turn face down when used; **STANDING** perks never turn over.

**Cutting:** the dashed rectangles are cuts. The dotted line down the middle of each token, marked with a triangle at each end, is a **fold** — fold it backwards so both printed faces end up outside, and glue.

|                                                                                                                                                                                                                |                                                                                                                                                                                                       |                                                                                                                                                                                                                  |                                                                                                                                                                          |
